Biography

GeneM is an alternative electropop band from eastern Switzerland, founded in 1999. The band consists of the members Mo, Kafi and Reto. GeneM means "Generation Mix". Two generations got together to live out their passion for music and share unique sounds with the world. After hard work and numerous gigs in clubs and festivals, they released their debut album "Fluid (GeneM)" in 2001, which was well received by critics and fans alike.

In 2005, they released the album "I've seen (zoom/zyx)." The album showed greater clarity in their arrangements and an expanded range of styles that made their music even more appealing.

After a long break, the three musicians got back together and released the EP "Time (GeneM)" in 2021. Over time, they have developed their sound and found their own style, which is sometimes rushing like a stream, sometimes fragile like the wings of a butterfly, yet powerful and pulsating. GeneM sometimes let the listener drift, float away, only to gently bring him back down to earth and carry him off into a completely new world of his own.

They will continue to write, record and perform new music with passion in the future. GeneM remains one of the bands from Eastern Switzerland that are definitely worth an ear and an eye.

Press

„Despite mouth guards and melancholic undertones, one thing was quite obvious; both the audience and the band had a lot of fun."

Thurgau Culture, October 2020

„GeneM lets electronic tinkering collide with frenzied rhythms and sharp metal riffs, intertwining dreamy guitar pearls with soaring melodies."

Landbote, August 2005

„GeneM took the listener on a journey into a world of sound and tone as few can. The heterogeneous repertoire also testifies to the band's high level."

Thurgauer Zeitung, May 2005

„GeneM a sizzling mixture. An extraordinary group enchants with extraordinary music."

Regional Newspaper, July 2003
